1. **Create a HTML5 program to calculate multiplication and division of two numbers as per the mockup shown below.**

<p align="right">**[20 Marks]**</p>

1st Number : [   ]
2nd Number: [   ]
[Multiply] [Divide]

The Result is :

- Take input from the user.
- Use JavaScript/Jquery to validate.
- All the fields are mandatory.
- Clicking on button "Multiply" or "Divide" will show the result accordingly.

2. **Write a Single Page Application (SPA) using React JS as shown below in the mock up.**

<p align="right">**[20 Marks]**</p>

Todo List

Task Name: [   ] Duration: [   ] [Add List]

Task Name	Task Duration
Coaching	5 hours
Home Work	3 hours

- There is a form below the header where Task Name and Duration can be entered.
- Clicking "Add List" button will add Task Name and Duration below the form shown in tabular format.

- State can be managed with React State or Redux.
- Styling can be done using CSS/Bootstrap.
- Look and Feel of the Application may differ from the mockup.
